Asthma-like pulmonary syndrome due to *Mycobacterium bovis* in a C3H/HeJ mouse infected intratracheally with *Mycobacterium bovis*. An experimental pulmonary bronchoalveolar syndrome in C3H/HeJ mice was produced by intratracheal (IT) inoculation

---

of *Mycobacterium bovis*. Infected animals had highly reproducible clinical and histological lesions consisting of centrilobular bronchial obstruction, neutrophilic alveolitis and necrosis of pulmonary parenchyma. The lesions were similar to those observed in human pulmonary tuberculosis. About 100% of animals had detectable levels of mycobacteria in the blood,

---

spleen and lung at the time of death. Most lesions were present by day 14 and the incidence of death from respiratory distress increased with time. In contrast, none of the mice infected intratracheally with *Bacillus Calmette-Guérin* developed any of these lesions, even after 30 weeks of observation. The occurrence of pulmonary lesions was dependent on age at

---

inoculation with *M. bovis*. IT injection of less than 10(2) colony forming units/ml of *M. bovis* produced no lesions; inoculation of 10(3) or more colony forming units/ml killed some animals. Serological testing indicated that the pulmonary lesions were due to *M. bovis* infection. The results indicate that C3H/HeJ mice are sensitive to mycobacterial infection of the lower

respiratory tract and may be a suitable model for the study of mycobacteriosis. Coral trout A coral trout is a type of tropical freshwater fish in the family Cyprinidae. They are native to many large freshwater rivers in Asia and the Indian subcontinent. Like true trout, they will take only live food, and they are found from deep in lakes or river to brackish estuaries and coastal waters.

---

Their diet consists of insect larvae and other invertebrates, and may eat fish such as tilapia and cyprinids. Appearance and behavior Coral trout tend to have a large head with small eyes on a long snout. Their bodies are slightly compressed laterally and fairly flattened dorsoventrally. Like their relatives, the true trout (family Salmonidae) and, some other Characiformes such as the
